

THREAT ADVISORY

ACTOR REPORT

Earth Longzhi: New subgroup of APT41

Date of Publication

November 10, 2022

Admiralty code

A1

TA Number

TA2022251

Summary

First Appearance: 2020

Actor Name: Earth Longzhi(Subgroup of APT41)

Target Region: East and Southeast Asia

Target Sectors: Defense, Aviation, Insurance, Government, Healthcare, Academic, Infrastructure industries and Urban Development

Actor Map

CVE

CVE	NAME	PATCH
CVE-2019-16098	Privilege escalation in Micro-Star MSI Afterburner	

Actor Details

#1

Earth Longzhi is running a spearphishing campaign to infect organizations with a payload such as Cobalt Strike loader, Symatic loader, CroxLoader, BigpipeLoader, OutLoader, and other custom hacking tools.

#2

Furthermore, it was seen using the CVE-2019-16098 driver, which allows authenticated users to read/write any arbitrary address, including kernel space. Since Earth Longzhi uses similar TTPs and metadata to Cobalt Strike, it has been considered a subgroup of APT41.

Actor Group

NAME	ORIGIN	TARGET REGIONS	TARGET INDUSTRIES
Earth Longzhi (APT41)	China	East and Southeast Asia	Defense, Aviation, Insurance, Government, Healthcare, Academic, Infrastructure industries and Urban Development
	MOTIVE		
	Financial crime, Information theft and espionage		

Recommendations

Security Leaders

Phishing simulations and routine education and awareness training and communications rarely account for MFA fatigue and web browser hygiene. Integrate and communicate all lessons learned.

Security Engineers

- **Uni5 Users:** This is an actionable threat advisory in HivePro Uni5. Prioritize and block all indicators attributed to the threat actor through your Command Center. Test your controls with Uni5’s Breach & Attack Simulation.
- **All Engineers:** Refer to and action upon the ‘Potential MITRE ATT&CK TTPs’ & ‘Indicators of Compromise (IoC)’ on the following pages.
