

HivePro Uni5

End-to-End Vulnerability Management

Based on Your Unique Threat Landscape

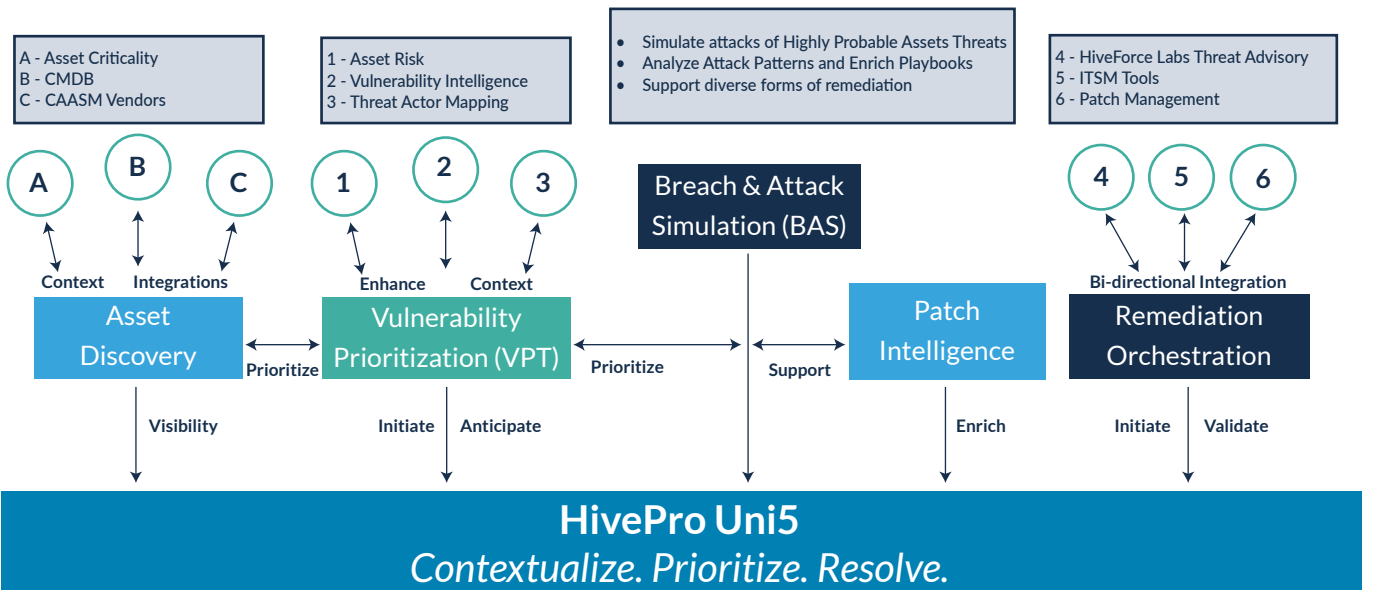

HivePro Uni5 shifts you from damage control to proactive defense by targeting and eliminating genuine business threats before they materialize into attacks.

HivePro Uni5 combines cutting-edge threat intelligence, precise vulnerability insights, your assets' context, environmental context, and more to predict likely attacks, prioritize vulnerabilities, test your security controls, and effectively steer end-to-end vulnerability management.

HivePro Uni5 provides actionable, tailor-made threat and vulnerability intelligence, streamlining security management by eliminating the need for multiple consoles and reducing overhead costs. Efficiently remediate crucial vulnerabilities, monitor proximal threats, and test security controls, and elevate your organization's security posture with HivePro Uni5 today.

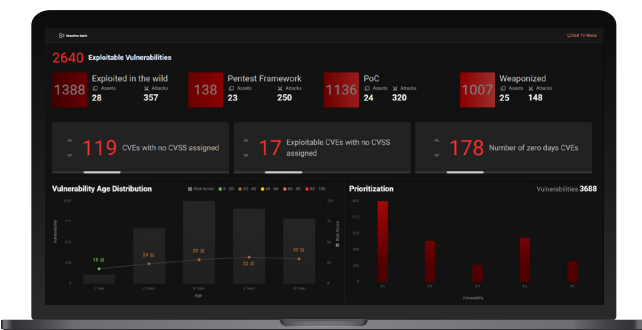

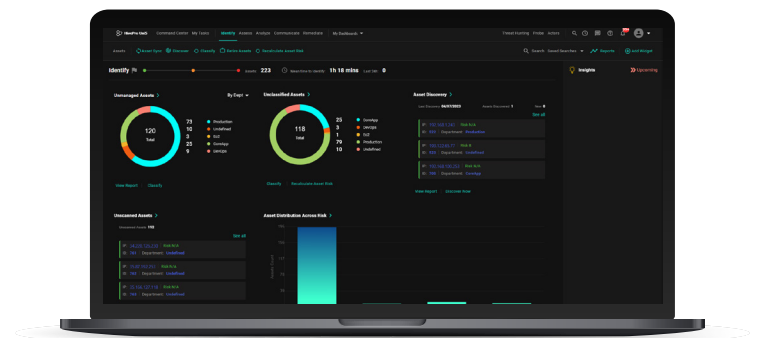

Experience streamlined integration across three key phases: contextualize threats and vulnerabilities according to the business-criticality of assets; prioritize vulnerabilities based on business-criticality and the proximity of threats; and resolve vulnerabilities using intelligence-rich remediation paths.

HivePro Uni5: Vulnerability & Threat Exposure Remediation

Contextualize

Ingests cloud and on-prem asset information from various tools, sorting them by business-criticality and providing visibility into all internal and external risks.

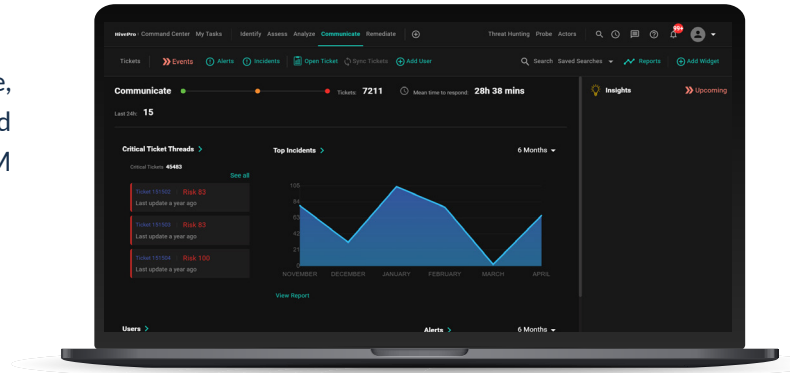

Prioritize

Combines internal IT and business intelligence with in-house and external threat intelligence to prioritize critical vulnerabilities, using predictive modeling to predict potential threats.

Resolve

Orchestrates remediation through patch intelligence, recommended configuration changes, and integrations with Asset Management and ITSM platforms, tracking workflows and security posture.

Key Benefits

Tailor-Made For All Organizations

HivePro Uni5 adapts to your organization's maturity, refining processes such as DevSecOps, security control testing, and threat intelligence as your needs grow.

Rich Intelligence & Timely Remediation

With an easy-to-read interface, HivePro Uni5 maps critical assets, associated vulnerabilities, and the threats most likely to exploit them, enabling focused and timely remediation.

Strong Cross-Function Collaboration

Promote cooperation and collaboration across teams with HivePro Uni5's transparent information and integrated workflows, processes, and decisions.

Rational, Timely, In Sync Workflows

Optimize workflow frequencies and track remediation cycles, risk tolerance, and compliance mandates with HivePro Uni5.

Security Optimization

Identifies unknown vulnerabilities and prioritizes significant threats, to help organizations make informed decisions about their security posture and future-proof investments.

HivePro Uni5 now supports 27+ out of the box integrations

Experience the Power of HivePro Uni5

Deploy in less than an hour to permanently manage your threats and vulnerabilities.
