

THREAT ADVISORY

Privilege escalation vulnerability in Citrix Workspace for Linux

TA2022008**Threat Level****AMBER****Publish Date – Jan 12, 2022**

A local privilege escalation vulnerability could allow a local user to gain root privileges on the computer running Citrix Workspace app for Linux.

This vulnerability (CVE-2022-21825) affects the Citrix Workspace app for Linux 2012 - 2111 and only exists if App Protection was installed as part of Citrix Workspace app for Linux.

Hive Pro researchers strongly recommend that affected customers upgrade to a fixed version as soon as possible.
