# THREAT ADVISORY

**ATTACK REPORT**

## **New Post-Exploitation Exfiltrator-22 Ransomware Framework Designed to Evade Detection**

Date of Publication

February 27, 2023

Admiralty Code

A1

TA Number

TA2023105

# Summary

**First Appearance:** November 2022

**Target Countries:** Worldwide

**Attack:** Exfiltrator-22 is a new post-exploitation framework for spreading ransomware and data theft. It is believed to be created by former LockBit 3.0 affiliates and is offered for a subscription fee ranging from \$1,000 per month to \$5,000 for lifetime access.

# Attack Details

## #1

A new post-exploitation framework called EXFILTRATOR-22 a.k.a. EX-22 appears to have been created by a group operating in North, East, or South-East Asia. The group is skilled in defense evasion and anti-analysis techniques and is utilizing leaked source code to develop its own framework, which is being marketed as fully undetectable by every antivirus and endpoint detection and response vendor.

## #2

The framework is being sold as a subscription-based service, with lifetime access costing \$5,000 and per month \$1000. The threat actors behind the framework have utilized domain fronting to conceal its command-and-control traffic, and similarities have been identified with a LockBit3.0 sample that has been actively used in LockBit3.0 campaigns.

## #3

EXFILTRATOR-22 comes with a range of capabilities that allow an attacker to spread ransomware within corporate networks without being detected. Despite its high price, Exfiltrator-22 is expected to generate much interest in the cybercrime community, resulting in further code development and feature improvements.

# Recommendations

### Security Leaders

Phishing simulations and routine education and awareness training and communications rarely account for MFA fatigue and web browser hygiene. Integrate and communicate all lessons learned.

### Security Engineers

- **Uni5 Users:** This is an actionable threat advisory in HivePro Uni5. Prioritize and block all indicators attributed to the threat actors and attacks through your Command Center. Test your controls with Uni5's Breach & Attack Simulation.
- **All Engineers:** Refer to and action upon the 'Potential MITRE ATT&CK TTPs' & 'Indicators of Compromise (IoC)' on the following pages.
